Ms. Emily Laine Chair, NEPOOL Reliability Committee ISO New England, Inc. One Sullivan Road Holyoke, MA 01040-2841

Dear Ms. Laine,

In accordance with Schedule 12C of the ISO New England ("ISO-NE") Transmission, Markets & Services Tariff ("ISO-NE Tariff"), Eversource Energy Service Company ("Eversource") hereby submits the attached Transmission Cost Allocation ("TCA") application(s) reporting cost support information associated with the construction, retirement, or modification to facilities rated 69 kV and above that qualify as regional Pool Transmission Facilities ("PTF") for the following Eversource project:

ES-21-TCA-44 A111 115-kV Line Asset Condition and OPGW Project (Webster substation – Pemigewasset substation)

Eversource is requesting that ISO-NE submit this TCA to the NEPOOL Reliability Committee for review, in accordance with ISO-NE Planning Procedure No. 4 ("PP-4").

If you have any questions, I can be reached via the information listed above.

Sincerely,

David J. Burnham

David J. Burnham

PROJECT COST ESTIMATE & SCHEDULE SHEET

Transmission Owner: Public Service Company of New Hampshire

RSP Project #: 279

Project Name: Webster-Beebe River 115-kV Corridor Asset Condition and OPGW Project - A111

Date: Aug-21

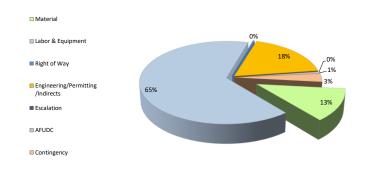

1. Project Scope Summary

This project will replace 116 wooden structures with self-weathering steel structures, replace 10.6 circuit miles of 336 ACSR conductor with 1272 ACSS conductor and replace 10.6 miles of two 3#6 copperweld static wires with two 48F 0.646 Optical Ground Wire (OPGW) on the A111 115-kV Line (Webster substation - Pemigewasset substation). The structures have deficiencies such as: woodpecker damage, rot, cracks and deteriorated steel mechanical connections.

2. Project Cost Summary
