Subject: Update to the March 2024 RSP Project List and Asset Condition List Update

This memo serves as the notice of updates made to the final March 2024 RSP Project List and Asset Condition List Update. Stakeholder comments identified an error on the project descriptions of the Asset Condition Project (IDs 389-396) where the project descriptions erroneously included OPGW installation. Corrections have been made to the Final Asset Condition List and the presentation that covers the RSP and Asset Condition list updates.

The revised Asset Condition list and redline and clean versions of the presentation are posted under the Regional System Plan and Related Analyses on the ISO-NE external website ([Regional System Plan and Related Analyses](#)), and are contained in the following files:

- final_Project_List_Presentation-Mar_2024_redline.pdf – This file contains the redline version of the presentation with changes
- final_Project_List_Presentation-Mar_2024_clean.pdf – This file contains the clean version of the presentation
- final_AssetCondition_List-Mar2024_revised.xlsx – This file contains the revised final March 2024 Asset Condition List

The responses to stakeholder comments for the draft RSP Project List and Asset Condition List March 2024 Update are also posted under the [Regional System Plan and Related Analyses](#) and the [Planning Advisory Committee](#) websites, and are contained in the following file:

- responses_to_stakeholder_comments_on_Mar_2024_ACL.pdf – This file contains the ISO responses to stakeholder comments
