Hi Jasmin –It appears that they have some applicable experience and likely qualified enough to do the work, and it is ultimately Eversource’s choice to go with whom they want. They are probably less experienced than the botanists mentioned, but it doesn’t mean they can’t do a perfectly good job. It may translate into a little more work on my part because I haven’t worked with them specifically and vice-versa, communicating about our protocols and plants to survey for, familiarity with our RFSS species, etc. Bottom line is GZA will be fine if it is their preference.

Dan

Hi Dan,

Thanks for providing the recommendations. Eversource wants to know how we feel about botanists from GZA conducting the survey? Attached are their resumes for your review. Logan Young would be the lead on the effort.

Thanks,
Jasmin

Hi Jasmin- in alphabetical order by first name, some botanists that have done work for the WMNF in recent memory. They are all equally capable of doing the work. Elisabeth (Tii) did a powerline survey for First Light project a couple of years ago in Waterville Valley, so if they did go with her, what we asked her to do last time would transfer well to this project. That said, it would not be a big deal to describe to any one of these folks what we need as far as survey requirements etc. It will probably just come down to availability.

Best, Dan

Hi Dan,

Just a friendly reminder that Eversource is still awaiting third-party recommendations.

Thanks,
Jasmin

Hi Dan,

Eversource is prepared to engage with a third-party for the vegetation survey after I told them about your limited capacity to complete the survey by the end of summer. Can you please provide recommendations?

Thanks,
Jasmin

Hi Jasmine- We have set Aug 1 as our new target survey date.

Cheers!

Dan

PS...I put a bottle of Melinda's Extra Hot habanero sauce in the break fridge for general

consumption. Check it out sometime! (it is not all that hot, compared to their xxx and xxxx sauces)

Good morning Dan,

It was mentioned in the January SPD call that the July 25th botany field visit needed to be rescheduled as there is a conflict with the One Mile Lonesome project. I'd like to provide Eversource with an updated timeline once you nail down a new date for the field visit.

Thank you!
