Hi Fred,

Thanks for your call from a few weeks back about the Eversource B112 Line Rebuild Project. Below are the questions I asked Eversource, and their response is in red:

- For access improvements along Kiah Pond Road, where are they getting their fill material from? Hopefully not the gravel under the powerlines since they're contaminated with lead casings. **Material will not be removed from the ROW (including the shooting area between Kiah Pond Rd and Sandwich Notch Road) to improve Kiah Pond Road.**
- Will there be any road improvements along Algonquin Road – near the junction at Lower Hall Pond Rd? **Algonquin Road will be maintained by the contractor throughout the course of the project. Upon completion, the road will be left in as-good-as or better condition as that which existed prior to project-use. Any improvements to the road will need to be approved by the underlying property owner.**
- Are there Restoration Reports that will be filed periodically with NHDES as the project progresses? **Project areas are routinely monitored by a third-party consultant to ensure compliance with environmental regulations and permit conditions. NHDES will be provided weekly construction monitoring reports.**

Hope that covered our conversation. Please feel free to reach out to me directly via email or phone 603-481-6576 if you have any other questions or concerns regarding this project.

Thanks,
Jasmin
