Thanks.

I have the material printed out and on our Program Assistant's desk for work next week. It is under \$2,500 so we may just be able to have her work and then pay her. Not sure. Chris

Chris,  
Here's the email from Andrew Dorsett with Mae's scope & estimate. Let Lou & I know how we can assist & enjoy your vacation.

Hi Shelley

I have not been able to catch up with Mae to work on a contract yet. I can have my assistant start to pull one together next week if someone can get me her information again. I know I have some cost information and information about her in an email but cannot find it.

If that can get back to me I can have my office start drafting a service contract for the work. My other issue is that my account to pay for this is our OHRV account, because for the past 5 years this was planned as an extension of the existing OHRV/snowmobile trail. But, now we have this issue of it being funding in part by TE funds which do not allow OHRV access. If I cannot have OHRVs on this section of rail corridor I cannot justify spending my OHRV land account funds on it. We will try to work through that issue here, but it is an issue that will be front and center in the very near future.

I will be out of the office next week but checking emails when I can.

Thanks, Chris

Chris,

I apologize for the delay in getting back in touch with you, but I have folks associated with the Town of Littleton calling me and asking me about Mae Williams and her involvement in the preparation of materials for the STB abandonment in Littleton; did DRED ever contract with Mae for her services? If so, please let me know when NHDOT should be prepared to reimburse DRED for half of the cost. If not, can we discuss the best & quickest way to move forward to work toward a resolution.

Thanks and apologies if there is an update that I have not been privy to,  
Shelley
