Good morning, Jasmin –

Stantec is assisting Eversource Energy with structure replacement work on an existing transmission line that runs from Whitefield to Berlin, NH (S136 Line). Portions of the existing line cross White Mountain National Forest (WMNF) lands in Jefferson, Randolph, and Gorham. As such, we are submitting the attached information to initiate the Special Use Permit screening process. A description of the proposed project, mapping for the project, initial agency consultation letters, and the Application for Transportation and Utility Systems and Facilities on Federal Lands (Standard Form 299) are included in the attached. My understanding is that you will lead this effort and will coordinate with Scott Hall and the District Ranger as needed – but please let me know if I should send this request directly to the District Ranger.

Heritage Consultants are also supporting this project from the cultural resources perspective. They submitted an ARPA permit application for work within the WMNF to Sarah Jordan on May 17, 2023. Please let me know if you'd like a copy of that application.

Please don't hesitate to reach out if you have any questions or require additional information to initiate the screening process. We look forward to hearing from you regarding next steps for this project.

Thanks,
Kara
