Subject: RE: trio pond dam and field visit Maggie

Maggie:

Thanks for yesterday field visit of Nash stream camps, and complexity of the easements monitoring, access for gravel pits and the Trio Pond Dam and its complexities with NH DES access on our land base and better understanding NHDES restoration efforts. I look forward to continually working with you and the team up in the northern country. I will plan to be on the call with you for the trio pond dam access issues. Happy Friday ! Thanks, Keri

Subject: FW: DNCR Lands & road improvements (Little Bog Dam and Lower Tril Dam - NHDES Rehabilitation Project meet in held 11/27/2023)

Importance: High

Hello Patrick and Will:

I confirmed with Bob Spoerl this morning that there were no Fish and Game staff on the Microsoft Teams Meeting held this past Monday it was only 2 NHDES staff and the rest of DNCR. DNCR was notified on by Corely Clark NHDES short notice to Maggie. Maggie asked Bob and I to be on with her. Originally Seth was not originally invited to this teams meeting. I invited him when he came to my office to discuss other topics and I communicated to him about this he asked if I would forward the invite which I did knowing he is the person who over sees or manages our DNCR dams and is the liaison with NHDES.

Confirmed the following in attendance on the teams meeting: Corey Clark, Craig Fennie, Maggie Machinist, Clint Savage, Charlie Krautmann, Micheal Timmins, Bob Spoerl, Keri Yankus and Seth Prescott

I researched the statue this morning with Bob Spoerl- It states the following:

“ Title L Water Management and Protection Chapter 4823 Dams, Mills , and Flowage – Acquisition by state of certain Dams & Water Rights Section 482:48

II.(a) Governor and council approval having been granted, legislative approval is hereby given to the land conservation investment program to accept the following dams and assign to the department of fish and

game for management purposes, including but not limited to operation and minor maintenance of said structure, as Follows:

- (1) Little Bob Pond dam , Odell, dam #185.03
- (2) (2) Trio Ponds dam , Odell, dam #185.02 “

Let me know if you need anything else. Keri

Seth

I was also struggling with the concept but from a different perspective. If we are doing the repairs/maintenance due to safety concerns then maintaining a level of access for EMERGENCIES makes sense. Put in a gate as part of the project to protect the road. If it proves to be a public nuisance, then lock the gate with a double lock pin.

Subject: DNCR Lands & road improvements

The comments at yesterday's meeting that, " people with Camp leases on DNDR property like the road impassable to keep the public out" is not something that should be viewed favorably by DNCR. The Minimal road improvements to access the dams should be made, no questions (not destroyed after) with all necessary BMP's for road construction and maintenance. The "public" has just as much right to enjoy the property as the Camp Leases, Excluding the area for the camp lease of course. Any camp leasee who believes different and tries to influence the exclusive private use of public property should be removed as they have likely enjoyed the privilege of a camp lease on DNCR property for too long. I am not advocating gates wide open, but lets be real. Also, interesting and reassuring how DES struggles to obey all their own rules when it comes to doing a project. On the 23 Dams DNCR owns on DNCR property we make necessary improvements to access, monitor and maintain the dams no questions. We also try to get all necessary permits. It would not be maintaining the standard to think we would restrict NHDES from doing the same for a dam under their control for maintenance on DNCR property. F&G actually Pays NHDES hundreds of thousands, annually to manage & maintain their dams.

Hello Patrick and Will:

I confirmed with Bob Spoerl this morning that there were no Fish and Game staff on the Microsoft Teams Meeting held this past Monday it was only 2 NHDES staff and the rest of DNCR. DNCR was notified on by Corely Clark NHDES short notice to Maggie. Maggie asked Bob and I to be on with her. Originally Seth was not originally invited to this teams meeting. I invited him when he came to my office to discuss other topics and I communicated to him about this he asked if I would forward the invite which I did knowing he is the person who over sees or manages our DNCR dams and is the liaison with NHDES.

Confirmed the following in attendance on the teams meeting: Corey Clark, Craig Fennie, Maggie Machinist, Clint Savage, Charlie Krautmann, Micheal Timmins, Bob Spoerl, Keri Yankus and Seth Prescott

I researched the statue this morning with Bob Spoerl- It states the following:

“ Title L Water Management and Protection Chapter 4823 Dams, Mills , and Flowage – Acquisition by state of certain Dams & Water Rights Section 482:48

II.(a) Governor and council approval having been granted, legislative approval is herby given to the land conservation investment program to accept the following dams and assign to the department of fish and game for management purposes, including but not limited to operation and minor maintenance of said structure, as Follows:

- (1) Little Bob Pond dam , Odell, dam #185.03
- (2) (2) Trio Ponds dam , Odell, dam #185.02 “

Let me know if you need anything else. Keri

Seth

I was also struggling with the concept but from a different perspective. If we are doing the repairs/maintenance due to safety concerns then maintaining a level of access for EMERGENCIES makes sense. Put in a gate as part of the project to protect the road. If it proves to be a public nuisance, then lock the gate with a double lock pin.

Subject: DNCR Lands & road improvements

The comments at yesterday's meeting that, "people with Camp leases on DNDR property like the road impassable to keep the public out" is not something that should be viewed favorably by DNCR. The Minimal road improvements to access the dams should be made, no questions (not destroyed after) with all necessary BMP's for road construction and maintenance. The "public" has just as much right to enjoy the property as the Camp Leases, Excluding the area for the camp lease of course. Any camp leasee who believes different and tries to influence the exclusive private use of public property should be removed as they have likely enjoyed the privilege of a camp lease on DNCR property for too long. I am not advocating gates wide open, but lets be real. Also, interesting and reassuring how DES struggles to obey all their own rules when it comes to doing a project. On the 23 Dams DNCR owns on DNCR property we make necessary improvements to access, monitor and maintain the dams no questions. We also try to get all necessary permits. It would not be maintaining the standard to think we would restrict NHDES from doing the same for a dam under their control for maintenance on DNCR property. F&G actually Pays NHDES hundreds of thousands, annually to manage & maintain their dams.

Subject: Nash Stream Project

Councilor Kenney: Below is the status of the Nash Stream project.

The Nash Stream project which includes 2 dams (Little Bog and Lower Trio) came at the request of Governor Sununu. We are using ARPA funds for the project and using GEI as our consultant/design engineer. Currently, the plan is to put this project out to bid in the late summer/early fall of 2024 and for construction to

take place in 2025 and possibly 2026. The project will include reconstruction of both dams as well as upgrading the road between the two dams so that it is accessible for concrete trucks. Wetland Permits will be submitted this spring/summer and there weren't any notable endangered species. We got hits for the Canadian Lynx and the Worl Begonia but you will get hits for those anywhere in NH north of the notches.

We don't know of drawdown plans yet as the design effort is only at a conceptual level. We will know more this winter when we get to the 60% design. GEI and their surveyor (BSC Group) have already surveyed both dams and the road and have mapped out wetlands, stream crossings, etc. Let me know if you would like to discuss further. Give me a call at 271-0677

Kind Regards,

Rene

All:

I would like to offer the conference room at DNCR's North Country Resource Center in Lancaster to conduct a public hearing on the proposed dam reconstruction. We have over 90 camp lessees on Nash Stream Forest who would appreciate the opportunity to better understand the proposal and ask questions.

Please let me know when the timing is right to schedule the meeting and we will reserve the room.

Best regards,

Patrick

Corry,

I'd like to chat with you when you get back next week concerning the dam replacements. If I remember correctly there may be fairly good private road from Philips Brook area that would get you within a

quarter of a mile from the Trio Pond dam. It has been 12 years or so since I've been on the road, and at the time the land owner was actively logging, so it might not be as good as I remember.

I have had some conversations with camp owners and I think it would be good for us to discuss the issue, and consider having a public hearing.

Hi Patrick,

We will certainly take you up on your offer to hold a meeting in Lancaster. While we know the concepts about the project, I would like to get some more design details in place before I meet with the public. I think this will help everyone's understanding of the project and our approach. Hopefully, we can hold this meeting at some point in February. I'll keep you posted.

Thank you,

Corey
