

## Northern Pass WMNF Special-Use Permit-Application Abridged or Approximately 93 Conditionals on the Corridor

“An estimated \$25 million a year... can be used... to help...  
Approximately... as estimated... can be... will help...stimulate... attractive...

Northern Pass has attempted... to minimize... as much as practicable... and seeks to achieve this,  
in part...

minimize... disturbance... Within...

Northern Pass anticipates being able to locate... approximately...

...nothing about this design or Proposed Use should be viewed as final...

Northern Pass anticipates...  
robust...  
in earnest...  
we provide...

Northern Pass is seeking to the extent possible to locate...  
could be...  
Depending on the amount...  
may, however eliminate the need...  
could also reduce... may reduce...  
would require approximately  
79 steel structures that could  
range from approximately  
100-135 feet in height... Based on the preliminary engineering.

To the extent possible... minimize impacts... appears to be a typographical error...

approximately 30,085 feet in length...  
approximately 21,823 feet in length...  
approximately... based on the preliminary design... to the extent feasible... could include...  
to minimize...

essentially clear...  
as necessary... minimize... to the extent possible...  
Where practical... to minimize...  
care would be  
taken... to the extent possible...  
could possibly...

Northern Pass requests a permit area for the life of the transmission line and thus requests a  
permit area for the maximum duration available under Forest Service regulations.

Approximately... approximately... seek to minimize...  
number and location... have yet to be determined...  
will likely consist of...  
minimize...  
may be located within... can vary in size... could range between  
5,000 and 14,000 square feet... depending... ultimately depend on... as much as possible...  
will update...

Northern Pass has...seriously considered... reducing or minimizing impacts to the extent practicable  
minimize impacts to the extent practicable...where possible...  
minimize... minimizing... minimize...  
can, as appropriate, be incorporated...  
maximizing... to the greatest extent practicable...  
may require... would likely involve..

Northern Pass has endeavored to minimize... while balancing... to the extent practicable...  
minimizes.. minimizing.. can be...  
help...  
estimates... will help...

Northern Pass... develop an approach that minimizes... to the extent practicable...  
not expected to have any impacts..  
minimize potential impacts... efforts will be taken... minimize... impacts...will be temporary.  
Permanent impacts will be avoided, minimized and mitigated.

Could consist of... sounds...will be temporary in nature...  
expected to occur... some impacts... some additional clearing and grading...45.5 acres of wetlands...  
avoid and minimize impacts to wetlands wherever possible...  
avoid or minimize impacts to wetlands...  
Most impacts to wetland... will be temporary...  
will revegetate...

Northern Pass will minimize and mitigate permanent impacts where avoidance is not possible...  
anticipated..

The Proposed Use is not anticipated to have any probable effects...  
depending on final design...
