I am opposed to the Lizzie Bourne Station proposed development, and I demand that the MWC conduct a thorough, independent, Environmental and Climate Assessment of the Summit Region and the entirety of Mt. Washington. I also demand that there be a complete moratorium on any future expansion, development, or construction of any kind until the completion of the Assessment and the subsequent Master Plan. This is for the preservation of not only a beloved monument of the Northeast, but of a delicate ecological region we cannot disregard without dire consequences.

I reject the July 5, 2022 Draft Master Plan as it stands and demand that no MWC Master Plan be written before a credible Environmental and Climate Assessment has been completed. Thank you for your time.
