The Mount Washington Commission
Master Plan Comments
172 Pembroke Road,
Concord, NH 03301

Dear Sirs;

The members of our household are firmly opposed to the recent plan to build The Lizzie Station for accommodation on Mount Washington. The present over-population of tourists each year already places an unacceptable burden on the health of the environment. The attempt to further monetize this unique mountain site on our Eastern mountain range is another example of the unfortunate motivation that has put the natural world of this country in a fragile and unhealthy condition needing more than ever to be protected.

Please add our negative input to the responses you receive in your survey of Valley residents.

Thank you,

Mrs. Dale S. Sjogren

Mr. Henry Theodore Sjogren

Mr. Morgon Belisle
