The e mail address is presented as and acts like a link The wording should say that it is an email address or be a link that properly opens one's email Your IT person and the paragraph writer have failed miserably

Also why don't we see the current proposal to add all those train cars up there for public review? I'm sure you are aware that it has been publicized and a huge Move On petition is ongoing about what is obviously being ignored publicly by the state

Thanks,

Mike
