Subject: RE: snowmobile trail in warren NH

Good Morning John,

I think there is some confusion. We do not have any jurisdiction over trails located entirely on private property. We only get involved if they access our ROW. The approved connector permit I sent is for the connector inside the State's ROW that used to end at the entrance to your property. It is now to the entrance of the trail on your abutter's property. The connector permit would not change because they are slightly revising where the trail connects to the ROW. I hope this answers your questions.

Thank you,

Chris

Hello Christopher

This is not the permit I have requested. This permit is dated May 1, 1992 27 years ago. This trail was just cut through the abutting property Dec 2019. This was not a existing trail nor ever used as one. You tell me that they can not use the access on that property as to which the trail was just cut on .But it's okay for them to use one that is not on that property. I'm still looking for the permit giving to the Asquamchumauko valley snowmobile club allowing them to cut the fence to access this limited access highway rt 25 warren NH for a trail that did not exist prior to Dec 2019.

Thanks

John Newton

Hi John,

Thank you for discussing your concerns with me the other day regarding the permitted snowmobile connector that runs parallel to NH 25 in Warren in the vicinity of your land. As we discussed, NHDOT has the authority to review and permit OHRV crossing and connector permits within State right-of-way. This includes the authority to break a right-of-way fence if needed. To your point that your abutter has a deeded access point just south of where the connector crosses the right-of-way line, this is for a driveway. Driveways and OHRV are separate review processes and independent of each other. Please find attached the approved connector permit for the section of trail in question. The snowmobile club and Bureau of Trails are currently working on an additional connector south of this one. We will provide a copy of that should it be approved. Do not hesitate to contact us if you have any further questions or concerns.

Thank you,

Chris

Hello Dennis

This is in regards to the trail that was cut in along my property in Warren going from Swain Hill Rd to rt 25. I'm looking for a copy of a permit allowing the snowmobile club or anyone to cut the fence along a limited access highway RT 25. that is not a access to that property meaning Doug Clark. His access to this property down the road 300 feet +/- with a road way going from the trail that was just cut to rt 25. No need to cut hole in fence . I do realize that the openings are deeded 50 feet. my opening is about that and is not connected to Doug Clark's property. So if there is no permit or RSA that gives anyone the right to cut through the fence other then the deeded right away I trust you will have the fence put back.
