¹ Do not provide concurrence signatures until corresponding information in Tables 1-3 has been fully completed. v.20211002

Table 1. Extraordinary Circumstances per FSH 1909.15(30)²

L. ESA and RFSS and Habitat		Wildlife
	(Y/N)	(Y/N)
Are T&E species or suitable habitat possible in the project area?	N	Y
Is any designated or proposed critical habitat present in the project area?		N
Are RFSS possible in the project area?		Y
Is a field visit recommended?		N
Are conservation measures needed?		N
Will the proposed action potentially have measurable effects on T&E species?		N
Will the proposed action potentially have measurable effects on RFSS? N		Ν
Determination of Effects under ESA Mark one:	Botany	Wildlife
1. No effect to species or critical habitat	Х	Х
2. May affect northern long-eared bats, but incidental take not prohibited under final 4(d) rule		
Was a streamlined consultation form submitted? (Y + date, or N/NA)		
3. May affect, but is not likely to adversely affect species or critical habitat ³		
Has concurrence from FWS been received? (Y + date, or N/NA)		
4. May affect, and is likely to adversely affect species or critical habitat ⁴		
Has the Biological Opinion been received? (Y + date, or N/NA)		
Determination of Effects to RFSS Check one:	Botany	Wildlife
1. Will not result in a trend toward federal listing or loss of viability	Х	Х
2. Will result in a trend toward federal listing or loss of viability		
Additional Information (Briefly describe design features, Standards & Guidelines, rationale for field vi	sit, resource	effects, etc.)
Botany: Some potential for RFSS, but likely small. RFSS and habitat will be checked for during NNIS conducte May 2022 did not reveal any RFSS plants or habitat. No effects. Bio: No NLEB consultation required due to no trees over 3" dbh being removed. Project occurs in h maintained powerline right of way. There is potential milkweed and wildflowers within the mowed important for monarch butterflies and yellow-banded bumblebees, both RFSS species. Keeping the right of way mowed ensures the floral resources continue to flourish in the ROW's and not be lost encroach into the ROW opening turning it into a forested area.	highly distur d right of wa e vegetatior	bed and ay, in the
2. Floodplains, Wetlands, and Municipal Watersheds		(Y/N/NA)
Have necessary state and/or federal permits been obtained ⁵ ?		Required
Is a field visit recommended?		N
Are design features needed?		N
Will the proposed action potentially have measurable effects on any of these resources?		N
Additional Information (Briefly describe design features, Standards & Guidelines, rationale for field vi	sit, resource	effects, etc.)
BMPs will be implemented to mitigate any potential impacts; Proponent will obtain all necessary p rep to oversee project implementation.		
3a. Designated Wilderness Areas		(Y/N/NA)
Is a Minimum Requirements Decision Guide (MRDG) required?		NA

Is a Minimum Requirements Decision Guide (MRDG) required?

² The mere presence of one or more of these resource conditions does not preclude use of a categorical exclusion. It is the degree of the potential effect of a proposed action on these resource conditions that determines whether extraordinary circumstance exist.

³ Informal consultation under section 7 is required.

⁴ Formal consultation under section 7 is required.

⁵ Clean Water Act permitting is not required prior to a decision, but must be obtained prior to implementation.

Table 1. Extraordinary Circumstances per FSH 1909.15(30)²

Has additional approval been obtained, if needed (e.g., Regional Forester for helicopter use)?	NA
Is a field visit recommended?	NA
Are design features needed?	NA
Will the proposed action potentially have measurable effects on this resource?	NA
Wilderness Area Name(s)	
Additional Information (Briefly describe design features, Standards & Guidelines, rationale for field visit,	, resource effects, etc.
	•
3b. Appalachian National Scenic Trail	(Y/N)
Is a field visit recommended?	N
Are design features needed?	N
Will the proposed action potentially have measurable effects on this resource?	N
Additional Information (Briefly describe design features, Standards & Guidelines, rationale for field visit,	, resource effects, etc.
3c. Designated or Eligible Wild and Scenic Rivers	
St. Designated of Lingible with and Sterric Rivers	(Y/N)
	Y
Is a field visit recommended?	Y N
