Steven J. Allen Eversource, ISO-NE Coordination phone: 860-728-4536 email: steven.allen@eversource.com

November 1, 2022

Ms. Emily Laine Chair, NEPOOL Reliability Committee ISO New England, Inc. One Sullivan Road Holyoke, MA 01040-2841

Dear Ms. Laine,

In accordance with Schedule 12C of the ISO New England ("ISO-NE") Transmission, Markets & Services Tariff ("ISO-NE Tariff"), Eversource Energy Service Company ("Eversource") hereby submits the attached Transmission Cost Allocation ("TCA") application(s) reporting cost support information associated with the construction, retirement, or modification to facilities rated 69 kV and above that qualify as regional Pool Transmission Facilities ("PTF") for the following Eversource project:

ES-22-TCA-27 NH 2029 Preferred Solution – Southern / 345-kV Amherst Synchronous Condenser Project

Eversource is requesting that ISO-NE submit this TCA to the NEPOOL Reliability Committee for review, in accordance with ISO-NE Planning Procedure No. 4 ("PP-4").

If you have any questions, I can be reached via the information listed above.

Sincerely,

Steven J. Allen

Steven J. Allen

cc: M. Drzewianowski

Cost	of Project:

7. Total Project Cost (\$ <u>M</u>) equals PTF + Non-PTF + all other Project Costs:	\$66.996	
8. Total Proposed PTF Costs		-
a. Total Proposed PTF Cost of this Project (\$M):	\$66.996	
b. Requested Pool-Supported PTF Costs associated with this Project (\$M):	\$66.996	-
 c. Breakdown of Requested Pool-Supported PTF Cost associated with this Project (\$M): (Consistent with Table 1 and Appendix D of this Procedure) 		-
Material	\$29.812	
Labor	\$19.964	
ROW	\$0.919	-
Engineering/Permitting/Indirects	\$5.134	-
Escalation	\$0.739	-
AFUDC (or equivalent)	\$3.854	-
Contingency	\$6.574	-
d. Generator Supported PTF Costs* (\$M):	\$0.000	-
If the costs in 8.b. plus 8.d. do not equal the total proposed PTF cost (8.a) explain and indicate who is responsible for the remaining costs.		
9. Total Proposed Non-PTF Cost of this Project (\$M):	\$0.000	
 Proposed PTF Costs (\$M) introduced as a result of local, state or other regulatory/legislative requirements, including costs identified pursuant to Section 1.6.3 of this PP-4. 	\$0.000	-
a. Description of Proposed PTF Cost introduced as a result of local, state or other regulatory/legislative requirements as defined in question 8 above.		
 All other Project Costs not captured in PTF Costs (8) or Non-PTF Costs (9) (\$M) associated with this Project: 	\$0.000	
12. Total PTF Cost based on: (check one) Actual Costs OR Estimated Costs*		
13. Valuation Year(s) of dollar amounts submitted above:2022		
14. If applicable, explain how the cost of common facilities were allocated between PTF and Non-PTF.		
15. Does this Project result in a change of existing Non-PTF facilities to PTF?	Yes	No X

an explanation why the preferred alternative was selected.	16.	Describe the major transmission alternatives, and their costs consistent with the breakdown provided in item 7 of this Application, that were considered. Provided
		an explanation why the preferred alternative was selected.

(Include available documentation relative to the major transmission alternatives analysis and selection.)

Alternative:

Install a +/-300 MVAR STATCOM with three 345-kV breakers. A STATCOM does not provide the necessary benefits to short-circuit strength and system inertia, and improvements in power quality that are achievable from a Synchronous Condenser. A STATCOM would also have much higher risk of control interaction with inverter-based resources. **Preferred:**

Install a +100/-50 MVAR Synchronous Condenser (SC) at Amherst 345 kV Substation with three 345 kV breakers. This alternative performs better under contingency analysis, provides much-needed voltage regulation in the area, and helps to increase area short-circuit strength, therefore, this is the Preferred Solution.

17. Has state and local siting been completed? If yes, explain the siting process and any provisions that were made during siting, provide docket or siting reference numbers. If no, then explain when siting is expected to be completed and any provisions that have been agreed to.

No unusual Siting required.

* Pool-Supported PTF costs were determined pursuant to Schedule 11 of Section II of the Tariff.

PROJECT COST ESTIMATE & SCHEDULE SHEET

Transmission Owner: Public Service Company of New Hampshire

Project Name: NH 2029 Solution Southern - 345-kV Amherst Sync Condenser

Date: Nov-22

RSP Project #: 1880

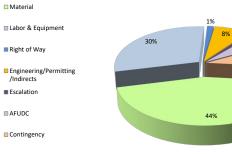

1. Project Scope Summary

Install one +100/-50 MVAR synchronous condenser and three 345-kV breakers at the Amherst substation.
