Ms. Emily Laine Chair, NEPOOL Reliability Committee ISO New England, Inc. One Sullivan Road Holyoke, MA 01040-2841

Dear Ms. Laine,

In accordance with Schedule 12C of the ISO New England ("ISO-NE") Transmission, Markets & Services Tariff ("ISO-NE Tariff"), Eversource Energy Service Company ("Eversource") hereby submits the attached Transmission Cost Allocation ("TCA") application(s) reporting cost support information associated with the construction, retirement, or modification to facilities rated 69 kV and above that qualify as regional Pool Transmission Facilities ("PTF") for the following Eversource project:

ES-21-TCA-35 330 345-kV Line Structure Replacement Project (Card substation to Killingly substation)

Eversource is requesting that ISO-NE submit this TCA to the NEPOOL Reliability Committee for review, in accordance with ISO-NE Planning Procedure No. 4 ("PP-4").

If you have any questions, I can be reached via the information listed above.

Sincerely,

David J. Burnham

David J. Burnham

Preferred: Field Inspections have indicated a significant amount of degradation and decreased load carrying capacity of wood 345-kV structures (many of the poles show signs of decay, woodpecker damage, rot and deterioration). Replacing the structures resolves multiple structural/hardware issues and supports safe and reliable operation of the transmission line. The state and local siting been completed? If yes, explain the siting process and any provisions that were made during siting, provide docket or siting eference numbers. If no, then explain when siting is expected to be completed and any provisions that have been agreed to. The provided docket or siting eference numbers are provided to the provisions of the transmission of the transmission line.		ve: Do nothing but for the reast	ons stated in 6 above is not acc	eptable.

^{*} Pool-Supported PTF costs were determined pursuant to Schedule 11 of Section II of the Tariff.

PROJECT COST ESTIMATE & SCHEDULE SHEET

Transmission Owner: The Connecticut Light and Power Company

RSP Project #: 263

Project Name: 330 345-kV Line Structure Replacement Project (Card substation to Killingly substation)

Date: Jul-21

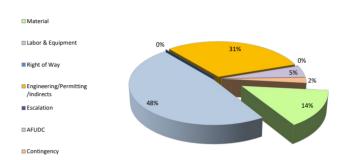

1. Project Scope Summary

Transmission Engineering has identified 25 wood structures on 330 345-kV Line (Card substation - Killingly substation) that are in need of replacement with steel poles. The structures have deficiencies such as: woodpecker damage, rot, cracks and deteriorated steel mechanics.
