H Jasmine and Sarah,

I'd like to DigSafe the WMNF test areas for the X178 project and begin testhole layout in some areas on Thursday and Friday of this week. The DigSafe flagging consists of white-flagged stakes along the road edge in the ROW nearest the test area and we collect all stakes and flagging once we're done. We use pink pin flags to mark out our test pit locations and collect all those once done as well. We'll have copies of the fully-executed permit on hand at all times.

Please let me know if you have any questions or concerns about the DigSafe flagging or testhole layout.

Thanks!

Jake
