Hi Jamie,

On behalf of Eversource Energy, attached is the Test Boring Work Plan that has been developed for the upcoming geotechnical test boring work at the Campton-Thornton Municipal Landfill. The work plan was developed for the two test borings to be drilled inside the limits of the landfill to support replacement structure design as part of Eversource's X178-1 Line Rebuild Project. Based on our November 13, 2024 pre-application/coordination meeting, it is our understanding the proposed test boring work is not a permit required activity and not subject to the permit modification required for proposed construction; however, it was requested we file the work plan as a courtesy to be included in NHDES's document files for the property.

Let us know if this email is sufficient notification/filing or if you would like to us to upload the plan directly to OneStop as well. A copy of the plan has also been sent by Eversource to the Town's attorney, Chris Boldt at Donahue, Tucker & Ciandella, PLLC.

Thanks,
~Jen
